Mohd Rehan Raza

React Developer

I am an enthusiastic developer who loves React is interested in making web applications dynamic, responsive, and user-centric. With experience building scalable frontend solutions, I have the necessary skills to turn complex ideas into digital experiences. I enjoy optimizing solutions for speed, building fresh project and integration opportunities with backend services. That's what I do-best to make great, meaningful stuff.

EDUCATION

Bachelor of Computer Application
Dr. Ram Manohar Lohia Avadh University, Ayodhya
07/2018 - 09/2021

XII
M Y Usmani Inter College , Utraula
06/2017 - 06/2018

X
M Y Usmani Inter College , Utraula
06/2015 - 06/2016

WORK EXPERIENCE

ReactJs Developer
Noble wave

09/2024 - Present   *New Delhi, India*

Achievements/Tasks
- **Managed state** of an application using **ContexAPI**.
- Enabled and **disabled multiple buttons** based on multiple conditions.
- Transformed multiple UI into **web-based** Application using React.
- Created **forms** using React and applied **validations**.
- Build various responsive **UI** and web applications using **Material UI**

SKILLS

React Js · JavaScript · SCSS · Html · Material UI · Tailwind CSS · API Integration · Git · MongoDB · Problem Solving · React Native

PERSONAL PROJECTS

Local-news (11/2024 - 05/2025)
- Designed and developed a fully functional **local-news website** using **React** , implementing modern UI/UX principles for an intuitive user experience.
- Utilized **React Router** for seamless navigation across pages, ensuring a single-page application experience.
- Optimized application performance by implementing **lazy loading** and **code splitting** , reducing initial load time.
- Ensured responsiveness and compatibility across multiple devices and screen sizes using **Material UI** .
- Deployed the application on **Netlify** enabling live accessibility with custom domain integration.
- **Live Preview:** https://localnews-up.netlify.app 🔗

Pokémon-Cards (06/2024 - 07/2024)
- Developed an interactive **Pokémon Card** website using **React** , showcasing detailed information such as height, weight, speed, experience, attack, and abilities for over 200 Pokémon.
- Consumed data dynamically from the **PokeAPI** (https://pokeapi.com/api/v2/pokemon?limit=200) using **Axios** or **Fetch API** to display real-time Pokémon details.
- Implemented a robust **search filter** feature, enabling users to easily find their favorite Pokémon by name.
- Enhanced responsiveness and user experience by crafting custom **CSS styles** , improving design skills and ensuring compatibility across devices.
- Demonstrated strong proficiency in React concepts such as **state management** , **component-based architecture** , and API integration.
- Deployed the application on **Netlify** enabling live accessibility with custom domain integration.
- **Live Preview:** https://statuesque-salamander-045111.netlify.app/ 🔗
